Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/531,716

Applicant(s)

SCHULLER, PETER

Examiner

Rex Holmes

Art Unit

3762

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-14 and 24-26 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-14 and 24-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 4/18/05.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application
- ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 6-11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Bullara (U.S. Pat. 4,573,481).
3. Regarding claim 1, Bullara discloses a lead body of insulating material (18), a plurality of conducting elements extending through the insulating material that are substantially identical (16a, 16b).
4. Regarding claim 2, Bullara discloses that the conducting element is helically wound (Fig. 1).
5. Regarding claim 6, Bullara discloses that conductor is wound clockwise for a portion and anti-clockwise for a portion (Fig. 10).
6. Regarding claims 7-8, Bullara discloses that the clockwise and anti-clockwise portions are equal in length (Fig. 10).
7. Regarding claim 9, Bullara discloses that the transition from clockwise to anti-clockwise is comprised of the conductive element folding back on itself (Fig. 10).

Art Unit: 3762

8. Regarding claims 10-11, Bullara discloses that the conductors are wound and twisted all of the way down the length of the body. It is further noted that the conductors are twisted 180 degrees at various portions of the body. It is further noted that one of the portions is directly at the mid-point of the lead (Fig. 1).

9. Regarding claim 14, Bullara discloses that the conductors can be made of platinum (Col. 3, ll. 53-55).

10. Claims 1-8, 10-11, 13-14 and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Diaz (U.S. Pat. 5,824,026).

11. Regarding claim 1, Diaz discloses a lead body with insulating material (17, 44), multiple layers of conductive elements (34, 42, 46) that extend the full length of the lead from one end to the other (Fig. 4).

12. Regarding claim 2, Diaz discloses that the conductors are arranged in a helically wound arrangement (Fig. 4).

13. Regarding claims 3-5, Diaz disclose that the conductors extend from one end to the other and are the same length to the end points (Figs. 1 and 4).

14. Regarding claims 6-8, Diaz discloses that the conductors are wound clockwise for a length and anti-clockwise for the same length (Fig. 4).

15. Regarding claims 10-11, Diaz discloses that the conductors are wound and twisted all of the way down the length of the body. It is further noted that the conductors are twisted 180 degrees at various portions of the body. It is further noted that one of the portions is directly at the mid-point of the lead (Figs. 1-2 and 4).

Art Unit: 3762

16. Regarding claims 13 and 24-25, the number of conductive elements varies per layer (Fig. 5).

17. Regarding claim 14, Diaz discloses that the conductors can be made of platinum (Col. 5, ll. 21-22).

18. Regarding claim 26, Diaz discloses that the conductors are constant with regards to its neighbors over the length of the lead (Figs. 4-5).

19. Claims 1-4, 10-12, 14 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Wessman et al. (U.S. Pat. 7,149,585 hereinafter "Wessman").

20. Regarding claim 1, Wessman discloses a lead with a body of insulating material (18, 17, 14), a conductive element (26, 36) that is comprised of a plurality of layers (Fig. 2).

21. Regarding claim 2, Wessman discloses that the conductors are arranged in a helically wound arrangement (Fig. 4B).

22. Regarding claims 3-4, Wessman discloses that the conducting lead extends from a first end to a second end and that the lengths of the conductors are substantially the same (Fig. 4B).

23. Regarding claims 10-11, Wessman discloses that the conductors are wound and twisted all of the way down the length of the body. It is further noted that the conductors are twisted 180 degrees at various portions of the body. It is further noted that one of the portions is directly at the mid-point of the lead (Figs. 1, 4B and 4C).

24. Regarding claim 12, Wessman discloses that each layer of conductors contains the same number of conductors (Fig. 2).

Art Unit: 3762

25. Regarding claim 14, Wessman discloses that the conductors are platinum (Col. 3, ll. 52-54).

26. Regarding claim 26, Wessman discloses a lead with a body of insulating material (18, 17, 14), a conductive element (26, 36) that is comprised of a plurality of layers in a helically wound arrangement (Figs. 2, 4B), with the conductors being constant with regards to its neighbors over the length of the lead (Figs. 2, 4B).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rex Holmes whose telephone number is 571-272-8827. The examiner can normally be reached on M-F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Angela Sykes can be reached on 571-272-4955. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3762

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
